

PLEASE DO NOT overturn NJs Do Not Call legislation in favor of the government's toned down version. Since signing up on NJs Do Not Call list the many, many unwanted, intrusive, and unsolicited calls I used to receive have almost been eliminated. I personally have also had a very bad experience after hiring a contractor that was provided to me through a telemarketing contact. After that incident, I knew that even if a telemarketer was giving away pounds of \$100 bills I would NEVER even consider anything a telemarketer had to say or sell! Now, I only trust those contacts I have that were referred to me by friends or family. No unwanted, intrusive, and unsolicited phone call could ever change that.
